bizhub
One i-Series
# Cloud Enabled

CONNECTING TOMORROW'S WORKPLACE TODAY

Born from our desire to use technology to seamlessly connect your dynamic environment, the bizhub One i-Series Cloud Enabled MFPs securely bring together people, places, and office products to embrace the new way you work. Featuring new enhancements, this range of devices will revolutionize your business, providing increased functionality and a simple user experience.

Giving Shape to Ideas

CONNECTED TO THE CLOUD

The new bizhub One i-Series Cloud Enabled MFPs offer enhanced integration with a range of connected cloud solutions and apps, allowing you to collaborate with others and store, print, or share documents securely with ease.

CLOUD SCANNING	CLOUD PRINTING	CLOUD FAXING	CLOUD SECURITY	CLOUD SHARING

CLOUD APP STORE

Access to the comprehensive Konica Minolta MarketPlace

Take advantage of a versatile selection of available apps, heightened levels of customization with the MFP UI Builder, Personalize app, and Authentication User modes along with centralized controls that allow you to efficiently manage and install apps across a fleet of Cloud Enabled MFPs.

Give your Cloud Enabled MFP the potential to do more and give you the flexibility to have it work the way you work. Imagine what you can do when you enhance your powerful MFP with cutting-edge technology.

CLOUD SCAN WORKFLOW

Scanning: With dedicated buttons on the control panel screen for one-touch access, the Cloud Enabled MFPs make it easier than ever to scan to cloud repositories (additional application purchases may apply) for streamlined workflow that bring improved efficiency to any office. With just the press of a button, you can quickly send scanned documents directly to your desired cloud storage space or other destinations, including direct-to URL, and Scan-to-Home.

- Perform frequently used scan applications simply & efficiently
- Easily change send options and/or preview field before transmitting
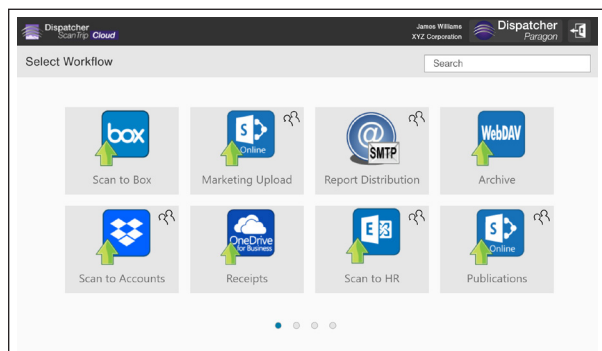

Dispatcher ScanTrip Cloud includes the most popular connectors – Box, Dropbox, SharePoint Online, Google Drive, OneDrive for Business, and more — so you don't have to worry about interoperability. Plus, the bizhub One i-Series Cloud Enabled MFPs using Dispatcher ScanTrip Cloud support zonal OCR, allowing you to easily convert and rename files using custom workflows, plus many other scanning automation features.

With Dispatcher ScanTrip Cloud, workflows are efficient and seamless. Documents scanned at the MFP can be automatically analyzed for important data, such as title and date using Advanced OCR and automatically renamed based on gathered data. Vital metadata is saved for export, processed documents and associated metadata are automatically saved to the appropriate folder for storage.
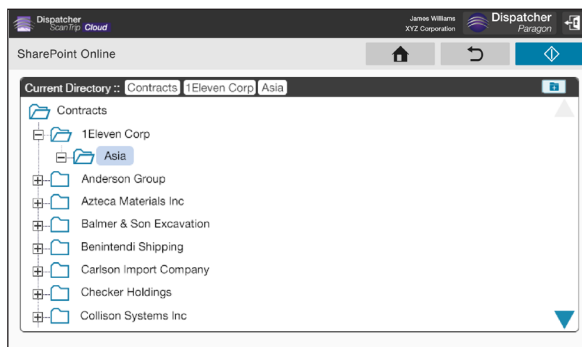

You can also browse your directory structure to easily choose a folder to store your documents in with type-ahead functionality to quickly filter the list of folders using the visually enhanced display at the MFP.

ADVANCED WORKFLOW

Dispatcher Stratus

Dispatcher Stratus is designed to streamline and consolidate your organization's processes by incorporating collaboration tools into Intelligent Document Processing (IDP). That means the processes that can be automated are automated, and the processes that require a human touch are simple to accomplish.

Your organization can use Dispatcher Stratus to:

- Allow employees to interact with documents and data as they progress through workflows.

- Intelligently capture paper-based or electronic files, as well as form data, into any workflow.

- Drive collaboration by ensuring your documents are available when and where personnel need them.

- Provide an easy-to-use and secure solution for indexing business-critical data using invoices, HR forms, contracts, and more.

- Customize workflows and forms to meet your business needs with intuitive Workflow Designer and Form Builder tools.

CLOUD SCANNING FOR EXTENDED CARE: HEALTHCARE-ENABLED MFP PLUS, CONNECTED BY KNO2®

The Konica Minolta Healthcare-Enabled MFP Plus, connected by Kno2®, enables you to quickly and securely capture, store, and share patient information across the care continuum. You'll be able to enhance care coordination, reduce costs, maximize staff productivity, and most importantly, improve patient care. It delivers EHR-integrated scanning, HIPAA-compliant cloud fax, and Direct Secure Messaging all from the bizhub control panel, contributing to better connectivity, improved efficiency and advancing the vision of an interoperable and connected healthcare system.

CLOUD PRINTING

Cloud printing provides unparalleled opportunities to mitigate risk. With zero-trust networking, print roaming, end-to-end data encryption, and more, Konica Minolta provides solutions that are secure by design.

Konica Minolta Mobile Print

The no charge KM Mobile Print app makes printing and scanning documents easy from your mobile device for both iOS and Android platforms. It provides users with enhanced functionality while offering a common experience among the various operating systems so employees with iOS-or Android-based devices will be able to take advantage of the diverse set of available mobile scan and print features:

Konica Minolta Mobile Print
Productivity

- **Print & Scan via Pull Scan**
- **Versatile Print Settings**
  (available features based on finisher configuration) :
  — Number of Copies/Prints, Select Color
  — Staple, Half-Fold, Binding Position
  — Specify Print Range

- **Print File Formats Supported:**
  — PDF, Searchable PDF, Encrypted PDF
  — JPEG, GIF, BMP, PNG, TIFF
  — XPS, DOCX, XLSX, PPTX

- **Scan File Formats Supported:**
  — PDF, Encrypted PDF, Compact PDF
  — JPEG, TIFF

The Konica Minolta Mobile App is supported by the extensive range of color and monochrome bizhub MFPs. The availability of this free, yet high-performing app brings considerable added value to all Konica Minolta customers, greatly expanding upon their investment.
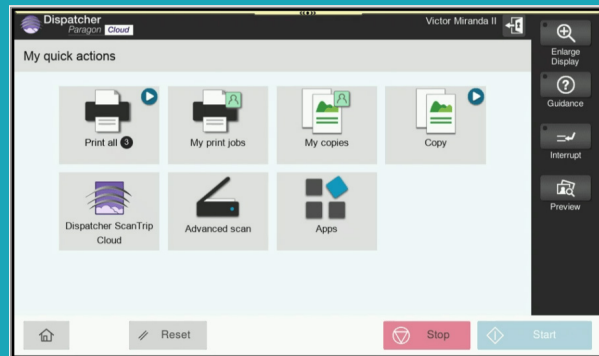

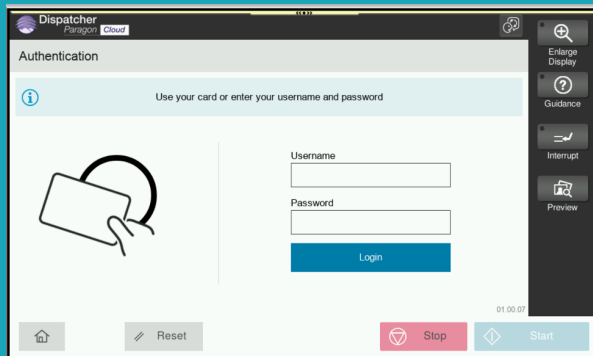

Dispatcher Paragon Cloud

Through Konica Minolta's Dispatcher Paragon Cloud technology, printing is simplified for businesses of all sizes, allowing users to print from anywhere to anywhere with ease. Through our secure Software-as-a-Service offerings, Konica Minolta is here to help you eliminate the complexities and costs associated with managing traditional on-premises print infrastructures, along with the potential deployment headaches.

Simplify and modernize your print infrastructures through migration to the cloud. Liberate your IT team to focus on more meaningful work and say hello to no print management.

Designed to support all customers in their digital transformation journey, Konica Minolta's Dispatcher Paragon will ensure fast deployment and effortless scalability (both up and down) while enforcing IT's cloud-first agenda to help make life easier for everyone printing – by introducing simple connectivity and high availability to their print environment.

Cloud printing provides unparalleled opportunities to mitigate risk. With zero-trust networking, print roaming, end-to-end data encryption, and more, Konica Minolta provides solutions that are secure by design.

bizhub Connector for Universal Print

When integrated with bizhub MFPs in the Microsoft 365 environment, the bizhub Connector for Universal Print allows customers to reduce print-related costs and realize a new printing experience with increased productivity. With this cloud print service provided by Microsoft 365, companies can be free from the management of on-premise assets for printing. IT admins no longer need to manage on-premise print servers. Everyday users who join Microsoft Entra ID (formerly Azure Active Directory) no longer need to install printer drivers.

CLOUD FAXING

- Send and receive faxes online through your email, the PC's native web browser interface, mobile device, Konica Minolta bizhub One i-Series MFPs, and other scanning devices.

- Fax at any volume from anywhere reliably and securely with the highest data protection and compliance across your business environment. Use your Konica Minolta bizhub One i-Series Cloud Enabled MFPs with or without authentication to print incoming faxes, or send faxes using the InterFAX MarketPlace App.

Robust security and encryption
- TLS 1.2/1.3 encryption for incoming and outgoing faxes
- Authentication via private and public key signatures
- "Delete Fax After Completion" feature
- PCI DSS Level 1 Certification
- SOC 2 Type II

Enterprise capabilities
- No PC client license charges
- Unlimited allowed senders
- Bulk fax broadcasting to up to 20,000 recipients
- Automated activity reporting
- Full audit trail of sent and received faxes

Flexible controls
- Customizable fax headers and cover pages
- Granular user credentials and permissions
- Delivery confirmation policies
- Automatic retry attempt settings

Konica Minolta bizhub integration
- Scan-to-Fax with the InterFAX Marketplace App
- Print incoming faxes with or without authentication

InterFAX

CLOUD SECURITY

Security features

Get the peace of mind you need when it comes to managing and protecting your information. The Cloud Enabled MFPs offer an advanced security system that is both reliable and easy to manage, including:

- Optional Antivirus Engine Using Bitdefender
- SIEM (Security Information & Event Management)
- Wi-Fi Certified Standards Supported
- Shield Guard

The Bitdefender option has been enhanced to send emails to administrators alerting them immediately to a detected virus during the virus scan process, enabling them to promptly investigate the issue and avert any potential issues.

SIEM collects relevant data from multiple sources, including the bizhub One i-Series Cloud Enabled engines, and identifies deviations from the norm so the appropriate actions can be taken.

Wi-Fi Protected Access 3 (WPA3) provides the latest encryption technology, strengthening the security of wireless LAN to better protect data over the network.

Shield Guard provides a cloud-based platform that reports on the security status of all of your compatible bizhub devices, notifies you in the event of an incident, and automatically performs mitigation.

SHIELD GUARD

CLOUD SHARING

Sharing features

Data is the heart of your company. With the volume of data growing year over year, enhance the way it is shared across multiple locations, through different browsers and platforms, while increasing access in a secure environment. Manage content sprawl and give your team the ability to collaborate, both in the office and remotely through a single gateway and robust application.

Meet the need for synchronization, cross-platform compatibility, collaboration, and mobile solutions while providing a seamless user experience.

Through Konica Minolta's cloud-based file storage and collaboration offerings, you'll have access to:

- Upload and consolidate content quickly and easily

- Share or receive large files, photos, videos, and more internally to your organization or externally using a simple link

- Control who can access your data, how, and when through access level permissions

- Quickly retrieve deleted or previously modified versions of files up to 90 days in the past

KONICA MINOLTA

1

ENHANCED FUNCTIONALITY TO SUPPORT YOUR DEVICES

With cloud-based bizhub vCare solutions, customers will experience enhanced customer care through highly efficient management of their Konica Minolta devices, automated meter collection, real-time alert notifications and vCare Mobile for remote support. The solution provides a level of automation that greatly streamlines the communication from your Konica Minolta device to greatly enhance performance.

Additionally, Konica Minolta's Shield Guard makes fleet management easy and efficient. Used for remote security monitoring and management of bizhub MFPs, Shield Guard allows administrators to proactively control the security status of their fleets centrally and remotely.

Increase productivity, streamline processes, and ultimately, enable smarter business with bizhub One i-Series.

Not all cloud solutions highlighted in this brochure come standard with the Cloud Enabled device. Please engage your local Konica Minolta sales resource for additional information.
